

Nonvoice Telco NFT Exchange (NFTX) Partnership Proposal

5th July 2022

NFTX Partnership

- Nonvoice is seeking a partnership to deliver the innovative NFT services to telcos
- Nonvoice provides a one stop shop for Innovative NFT services, including local and global content, customer journeys, credit card and telco billing, system integration, blockchain minting and accounting and customer support
- The NFTX is a hybrid private/ public exchange built specifically for telcos... enabling the telcos to keep the customer relationship on its NFTX

NFT DIGITAL COLLECTIBLES

1.

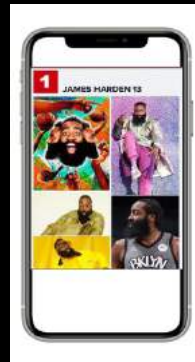

Click Here for more info and rewards, plus your weekly FREE NFT

Nonvoice gives every user a wallet tied to their mobile number and the NFTs are “loaded to their mobile phone number”

2.

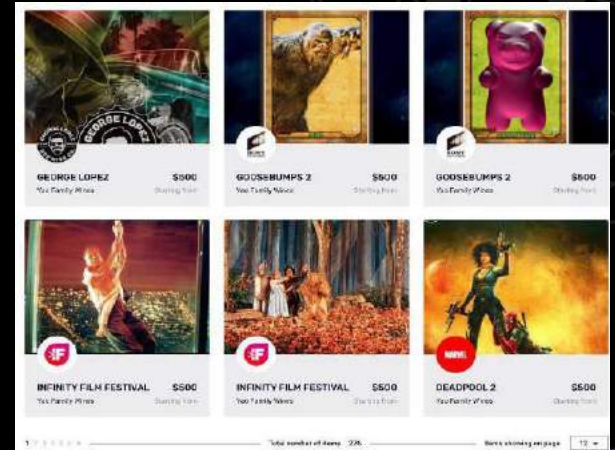

User receives NFT in private label wallet

3.

User can transfer or sell asset.

NFT DIGITAL COLLECTIBLES

SERVICE FEATURES

- Progressive Web App (PWA) so runs in any browser on any device
- Minimal operation integration with the telco as hyperlink based
- Load to the mobile phone number: no crypto-wallets are needed
- Dynamic NFT delivery: consumer doesn't need to log in to collect the NFT- if they are a subscriber, they automatically get the NFT loaded to their mobile phone wallet
- NFT drop frequency and issue size is customizable

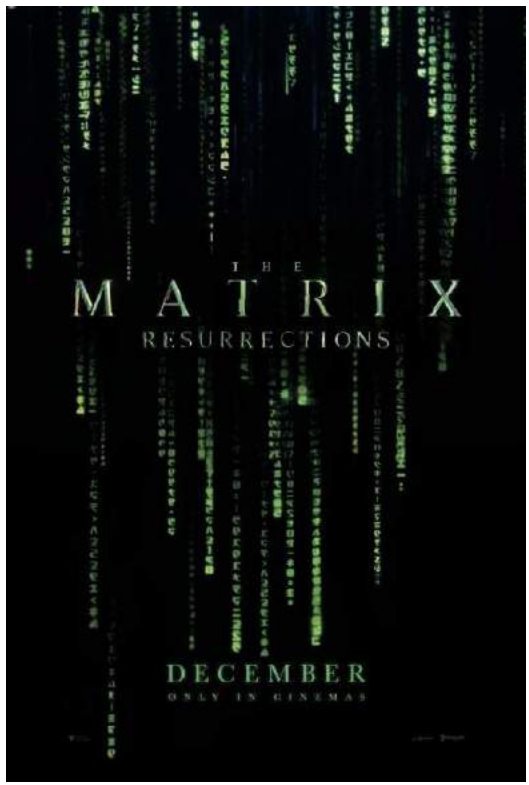

NFT DIGITAL COLLECTIBLES

MARKETPLACE FEATURES

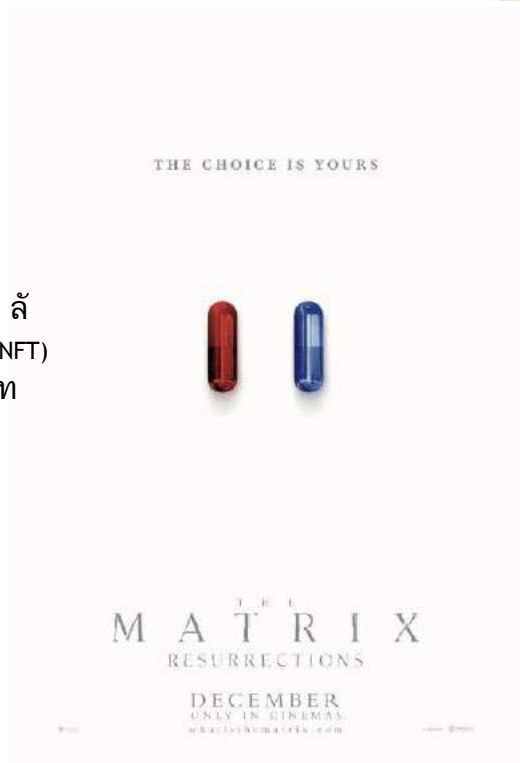

- Telcos can optionally monetize their own digital assets as NFTs
- Public/ private hybrid model: integrity of the blockchain with easy to use service pushed to the public blockchain: value and authenticity
- Auction/ eBay style buying and selling of NFTs
- Transactions in the the local fiat currency
- Transactions published to the public blockchain: all information is recorded so low expenses and low auditing costs

NFTX Products/Services

- Nonvoice NFTX platform supports and allows the distribution, purchase and sale through auction of multiple media types as NFTs:
 - Digital art collectibles
 - In game items for play to earn games
 - Rewards and coupons
 - Audio, video and other files types
- All NFT types are delivered seamlessly through a single user interface, powered by the GFT Exchange (GFTX) NFTX platform

Nonvoice Responsibilities

- Close working with global NFT creators
- Managing underlying GFT NFTX platform technology
- Provision of relevant marketing material
- Credit card billing system and DCB integration where applicable
- Payment distribution to telcos, platforms and content creators

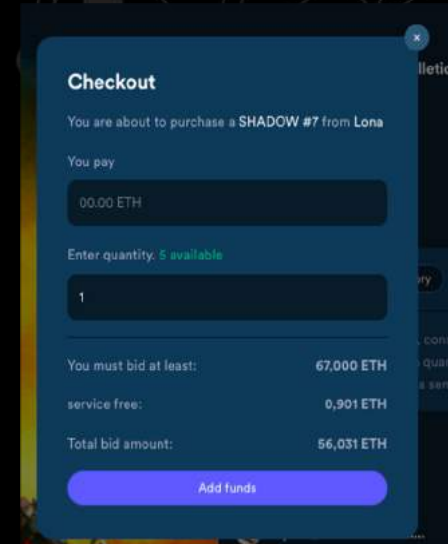

Telco Responsibilities

- Marketing, PR, and Communication - plans to be agreed
- Branding and Design template for the co-branded NFTX platform
- Sourcing of local content (optional)
- Telcos can provide special privileges in the form of NFTs

End User Pricing

- NFTs are one-time purchases or subscriptions which can be priced in any way
- Frequency and size of NFT drops can be determined by the telco
- All prices are in local fiat currency and subject to local sales taxes- there are no crypto wallets or currencies needed.
- Commission relationship- telcos earn a commission on initial sale and all subsequent sale- in perpetuity

The screenshot shows a checkout modal for purchasing an NFT. The title is "Checkout". Below the title, it says "You are about to purchase a SHADOW #7 from Lona". There are two input fields: "You pay" with a value of "00.00 ETH" and "Enter quantity, 5 available" with a value of "1". Below these fields, there is a table of costs:

You must bid at least:	67,000 ETH
service free:	0,901 ETH
Total bid amount:	56,031 ETH

At the bottom of the modal is a blue button labeled "Add funds".

THANK YOU
