The Nonvoice Metaverse proposition

- Metaverse is a key consumer 5G use case, engaging consumers with AR apps and NFTs on smartphones now and AR glasses in next 24-36 months when time is right
- Innovation and differentiation that evolves with the market
- Assists with the acquisition of 5G customers + retention and monetization of 4G
- All apps work on 4G but 5G adds more features like UHD video and simulcasting
- Marketing assets + experiences demonstrating 5G as a genuine consumer use case
- Fully localized white label solution
- Seamless authentication flow
- User Interface in local language
- Telco billing integration
- Cloud (AWS) Hosted solution
