

NFT Exchange (NFTX) Partnership Overview

29th November 2022

NFT Exchange Partnership

- Nonvoice provides a one stop shop for Innovative NFT services, including a full exchange, local and global content, customer journeys, credit card and telco billing, system integration, blockchain minting and accounting and customer support
- Nonvoice is seeking a partnership with telcos to deliver the innovative NFT services

NFT DIGITAL COLLECTIBLES

1.

Click Here for more info and rewards, plus your weekly FREE NFT

Nonvoice gives every user a wallet tied to their mobile number and the NFTs are “loaded to their mobile phone number”

2.

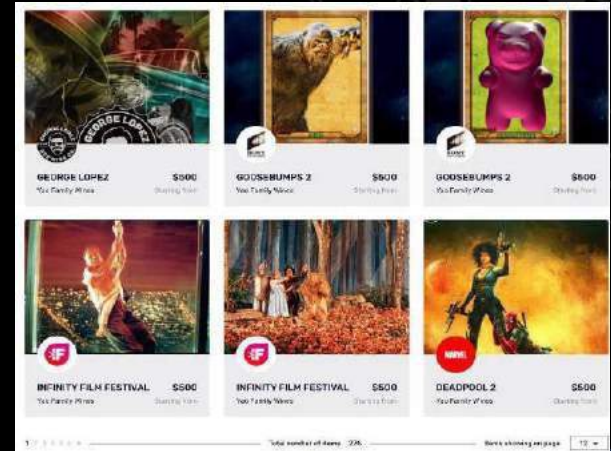

User receives NFT in private label wallet

3.

User can transfer or sell asset.

Service Features

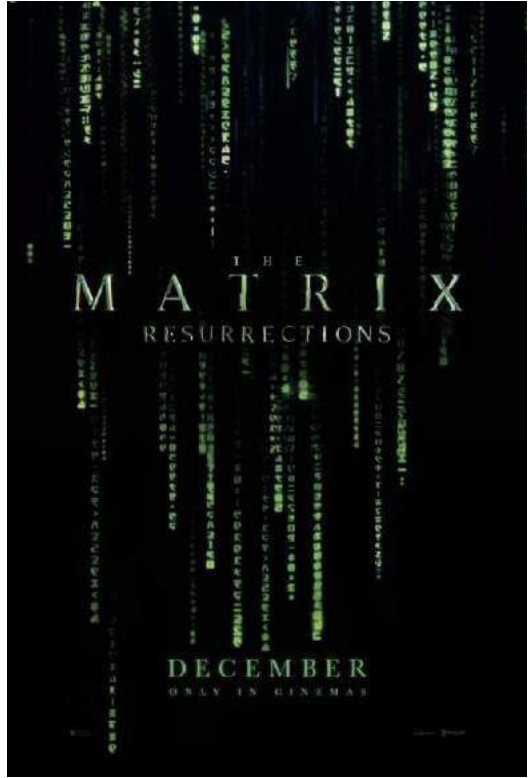

- Progressive Web App (PWA) so runs in any browser on any device
- Load to mobile phone number: no crypto-wallets are needed
- Dynamic delivery: consumer doesn't need to pull content, its pushed automatically to their wallet

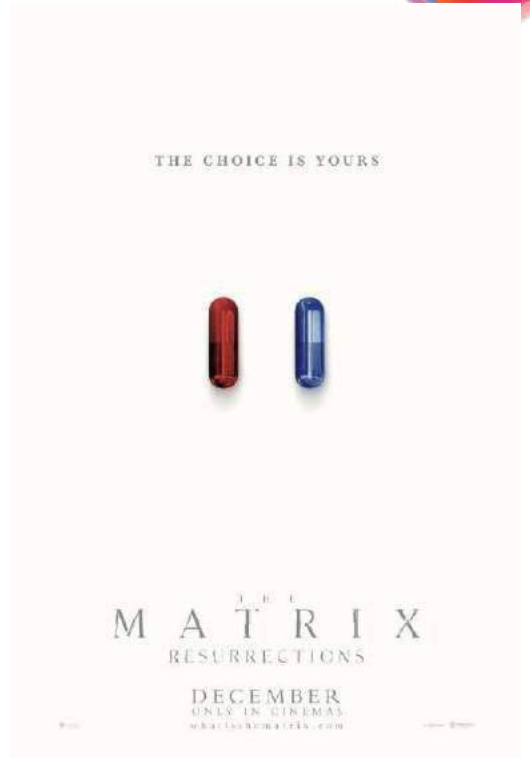

Marketplace Features

- Auction/ eBay style buying and selling of NFTs
- Transactions in the the local fiat currency
- Transactions published to the public blockchain: all information is recorded so low expenses and low auditing costs
- Telcos can optionally monetize their own digital assets as NFTs

NFT: The Matrix Resurrections Digital Collectibles

NFTX Products/Services

- Nonvoice NFTX platform supports and allows the distribution, purchase and sale through auction of multiple media types as NFTs:
 - Digital art collectibles
 - In game items for play to earn games
 - Rewards and coupons
 - Audio, video and other files types
- All NFT types are delivered seamlessly through a single user interface, powered by the GFT Exchange (GFTX) NFTX platform

Nonvoice Responsibilities

- Close working with global NFT creators such as Comic Con
- Managing underlying GFT NFTX platform technology
- Provision of relevant marketing material
- Credit card billing system and DCB integration
- Payment to platforms and content creators

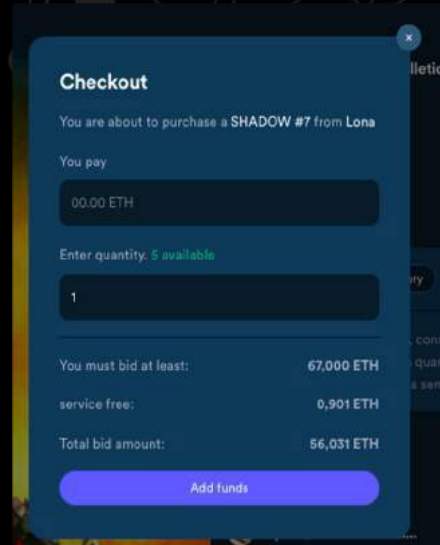

Telco Responsibilities

- Marketing, PR, and Communication - plans to be agreed
- Branding and Design template for the co-branded NFTX platform
- Sourcing of local content (optional)
- Telcos can provide special privileges in the form of NFTs

End User Pricing

- NFTs are one-time purchases or subscriptions which can be priced in any way
- Frequency and size of NFT drops are determined by the telco
- All prices are in local fiat currency and subject to local sales taxes- there are no crypto wallets or currencies needed.
- Commission relationship- telcos earn a commission on initial sale and all subsequent sale- in perpetuity
