

Nonvoice Agency scores a goal with the Soccer League Live app by Proxy42

November 4th 2020, Florida, USA – the world’s first 5G app agency, Nonvoice, is pleased to announce today the signing of new client, Proxy42, the first social Augmented Reality (AR) platform for casual and competitive mobile gaming. Nonvoice will be assisting with securing distribution and investment for their innovative new Soccer League Live app.

The Proxy42 app uses 5G and Augmented Reality (AR) to create an interactive experience for users. This enables gamers playing in the Soccer League Live app an enhanced experience and the feeling of playing in a real-life soccer match.

The app also offers increased fan engagement through various in-app challenges such as a ‘Catch’em All’ style challenge inspired by Pokémon Go where gamers can simply walk around any city and ‘catch’ a player to add to their digital collections. Once they have players in their collection they can add further items such as football gear.

“We aim to build a bridge between the physical and digital worlds in order to make gaming more accessible and interactive. We look forward to working with Nonvoice to maximise the success of our services so that more gamers can benefit from our multiplayer AR games,” explains Francesco Ferrazzino, CEO of Proxy42.

Simon Buckingham, Founder and CEO of Nonvoice added, “Following an exhaustive global search for great 5G apps, we are delighted to add the Soccer League Live app to our portfolio of world class apps. The Nonvoice team and I look forward to representing Proxy42 and assisting with their global mission to make Soccer League Live a huge global success”.

Proxy42 are the latest consumer app to join the agency alongside current clients, GIZER, the competitive gaming esports infrastructure that makes games social with feature rich gameplay; BOOKFUL, the 3D and AR reading app for children that turns screen time into productive learning time; STATEMENTGAMES Inc, the fantasy sports platform and; PLOTAVERSE, the suite of dynamic

photography solutions designed to help content creators and brands/marketers make engaging special effects and animations for stills and video.
