

Sir Linkalot are latest Education app to join with the Nonvoice Agency

April 23rd 2021, Florida, USA – The World’s first agency dedicated to 5G apps announces today that they have signed up another award-winning educational app, Sir Linkalot, to expand the channel that already includes popular apps such as Bookful and Leo AR. The Sir Linkalot app boasts almost instant results and improvements thanks to the multi-sensory functionality that has been developed to help students of all ages.

Designed by Thinkalink Digital in the UK, the app offers a great way to enhance school lessons and assist with home schooling and can also help children reach the national curriculum SPAG (Spelling, Punctuation and Grammar) criteria. In particular, Sir Linkalot is helping children (of all ages) commit to memory the spelling of tricky words all the way from 'was' to 'onomatopoeia'. It is managing to knock down barriers for students who have a learning block whether that be dyslexia or simply that English is not being their mother tongue. Non-phonetic patternless words have never been tackled before in this way and that's what separates Sir Linkalot from other apps.

“It is a sad fact that over a third of 11-year-old children don't have good literacy skills and this is something we are committed to changing. From data collected from usage of our app in the UK we see a typical improve on average 70% spelling scores to 150% for those who find learning difficult. With the help of Nonvoice we would like to see our app technology helping children around the globe,” explains Andy Salmon, [insert title] of Thinkalink Digital.

Simon Buckingham, founder and CEO of Nonvoice added: “Education is something that myself and the team at Nonvoice are particularly passionate about. With advances in technology, it is great to see apps like Sir Linkalot being developed to improve standards of education amongst the next generations. We look forward to assisting them to break into new markets around the world.

The Sir Linkalot app uses spelling animations, quizzes, puzzles and other unique teaching techniques to improve literacy such as creating word bundles and sorting these by level of difficulty and subject area. Each level contains 20 animations and users can choose from two tests: crossword spelling challenge and multiple-choice questions. Once they have passed a level they can progress to the next one.

About Nonvoice Agency

Nonvoice Agency is a network of agents searching for the best advanced consumer and enterprise 5G apps from around the world. The agency connects app developers with distributors and investors who then help accelerate the adoption and deployment of their application. Nonvoice Agency provides an ecosystem of key parties dedicated to the 5G value chain and the future benefits that these services will bring to the world.

Founder, Simon Buckingham, is available for expert commentary on 5G applications.
