

FOR IMMEDIATE RELEASE

Nonvoice signs up Topio Networks as the first Enterprise app to join the agency.

December 9th, 2020, Florida, USA - Nonvoice, the world's first agency dedicated to 5G apps, announces today that it signed up Topio Networks and their Enterprise app, Topio Use Case Radar. By joining the agency, Topio Networks will have access to Nonvoice's global distribution channels to grow its unique product's success.

Leveraging its AI-enabled Research Assistant technology, Carolus, Topio Use Case Radar is a market intelligence platform that tracks at scale more than ten thousand customer use cases across the industry. For each customer use case, users of the platform get actual, quasi-real-time, and dynamic data to select the right use cases and decide which partners to engage for the right go-to-market strategy or product development. Leveraging Topio Use Case Radar leads to a shorter time to market, reduced risks, enhanced company alignment. Mobile operators are already using the Topio Use Case Radar app to rank potential opportunities for 5G enabled apps and services and build their data-driven business strategy.

Philippe Cases, Founder and CEO at Topio Networks, commented: "We are delighted to be joining Simon and the Nonvoice Agency. Nonvoice is the ideal partner for our Technology maps. His team and partner agents offer us a breadth of knowledge and quick access to an exciting market. One of the exciting outcomes of this partnership is leveraging Nonvoice insights and feedback to improve our app and service offering."

"Partnering with Topio Networks is a unique opportunity. Our distribution partners are already working with Nonvoice's 50+ operator contacts in 43 countries worldwide. We look forward to helping our operating partners develop their 5G strategy with Topio Use Case App," Nonvoice Founder and CEO Simon Buckingham commented.

As part of the new partnership, Topio Networks and Nonvoice will be co-hosting a webinar, "5G and Healthcare: An Upcoming Revolution", on December 17th. The session will look at how hot the 5G Healthcare market is, what the 5G drivers are for the Healthcare market based on the type of use cases and technologies, and more. Full details of the event and how to register can be found here: <https://www.topionetworks.com/events/5fc9603578e002131c36d7f6>.
