

**FOR IMMEDIATE RELEASE**

### **Nonvoice signs partnership with Vrombr Remote Reality Racing**

September 28<sup>th</sup> 2021, Florida, USA – Pioneering Remote Reality Racing Game, Vrombr announced today that they have signed up to the Nonvoice Agency, the world’s first 5G app agency, to help take their No.1 gaming app to the world. As part of the new deal, Vrombr will have access to Nonvoice’s global distribution channels that cover all regions of the world as well as the wealth of knowledge and expertise within the Nonvoice agent network.

Vrombr is a pioneer of remote reality technology for smartphones using the popular sport of motor racing. The Vrombr mobile game allows players to control real model cars on real racetracks via their smartphone. Players from all over the world have the opportunity to play against each other in order to qualify for esports events and ultimately to become the best reality racing car driver. Vrombr is the best showcase for mobile phone carriers to demonstrate the value of 5G to large audiences.

“The aim was to take this popular sport to a new 5G audience. Never before have gamers or car driving enthusiasts been able to control a real race car around a real racetrack from their mobile device – until now. The sport of car racing is global and therefore we want to reach all fans around the world with the help of Nonvoice, explains Michael Pastor, Founder at Vrombr.

Fred Thuard, Nonvoice’s France-based agent who brought the app to the agency added: “as agents of Nonvoice we are working on opportunities for our current clients but also looking to onboard new apps to the agency. Nonvoice has a strict criterion for apps that we represent in order to ensure that they meet our ‘best in class’ motto so I am delighted to have introduced this innovative company and app to the agent team”.

Vrombr joins other eSports apps currently being represented by Nonvoice and its agents. Other titles include: the AR Soccer App, World League Live; Gizer, which turns the world’s most popular mobile

games into competitions and the sports focused social gaming and MarTech platform, StatementGames.

#### **About Nonvoice Agency**

Nonvoice Agency is a network of agents searching for the best advanced consumer and enterprise 5G apps from around the world. The agency connects app developers with distributors and investors who then help accelerate the adoption and deployment of their application. Nonvoice Agency provides an ecosystem of key parties dedicated to the 5G value chain and the future benefits that these services will bring to the world.

Founder, Simon Buckingham, is available for expert commentary on 5G applications.

#### **About Vrombr**

Vrombr is a child's dream come true. To have the ability to take control of a real car remotely, in real time and discover the world. Of course, regulations prevent us from being able to control objects that are "at large". That's fine, but Vrombr players from all over the world drive cars that are located on our tracks in closed and controlled spaces, somewhere in France. That's the magic of 5G and Remote Reality.
